SKILLS

Data & Analysis:	SQL (Oracle PL/SQL, Microsoft SQL Server), Excel, Tableau, Crystal Reports, Data Validation, ETL
Business Systems:	Quorum TIPS, FLOWCAL, Salesforce, Azure DevOps, Requirements Gathering, Functional Design, Gap Analysis, Requirements Traceability Matrices, QA/UAT, Workflow Configuration, Production Support, User Training
Technical:	Python

EXPERIENCE

Quorum Software Technical Consultant

Houston, Texas
July 2024 - Present

- Support long-running full-scale implementations, custom enhancements, and upgrade projects for Quorum TIPS Gathering clients in the natural gas processing and gathering space.
- Contribute to requirements gathering, functional design, gap analysis, and requirements traceability matrices to align software behavior with client operational workflows.
- Write SQL validation queries in Oracle PL/SQL and Microsoft SQL Server to investigate bad data, incorrect configuration, failed processes, and migration issues more efficiently than frontend-only review.
- Lead QA, UAT, and pre-production testing, create test walkthroughs, resolve configuration issues, and help support three successful go-lives plus post-production stabilization.
- Create user training materials, train clients and an internal colleague, and step into difficult client situations to rebuild trust through consistent follow-through, clearer communication, and reliable delivery.

Do-It Coding Co-Founder

Austin, Texas
June 2022 - September 2024

- Co-founded and operated a summer coding camp in Austin across multiple summers, teaching Scratch to more than 50 K-6 students and generating more than \$15,000 in revenue.
- Delivered daily project-based instruction, planned progressively harder mini-projects, and adapted lessons in real time for students with different skill levels.
- Managed parent communication, day-to-day operations, neighborhood and school-based marketing, and instructor interviewing and onboarding to support camp growth.

Mattress Firm Sales Associate

Austin, Texas
July 2021 - June 2022

- Guided customers through mattress selection and purchasing by identifying needs, explaining product options, and closing sales against store targets.
- Completed Mattress Firm's Consultative Selling Curriculum covering the sales process, operating procedures, service standards, and the omni-channel customer journey.
- Maintained visual merchandising and planogram standards across the sales floor.

PROJECTS

Ultimate IV Calculator Webapp

Next.js, TypeScript, FastAPI

Live: brendonbusker.github.io/UltimateIVCalculator-Webapp/ | GitHub: github.com/brendonbusker/UltimateIVCalculator-Webapp

- Built a full-stack Pokemon IV calculator web application with a Next.js and TypeScript frontend plus a FastAPI backend, replacing an earlier desktop-style tool with a browser-based experience.
- Implemented generation-specific IV, DV, Stat Exp, HP DV, and characteristic logic, plus historical stat data lookups and caching for multiple Pokemon game generations.
- Added a GitHub Pages static deployment path and production hardening such as security headers, environment-based host and origin controls, and rate limiting defaults.

EDUCATION

Baylor University BBA, Management Information Systems

Waco, Texas
August 2020 - May 2024

CERTIFICATIONS
